Customers outside the United States must place their orders through their local distributors. The World Bank has established this policy to provide efficient service at a fair local price. Customers benefit because their orders can be processed quickly and their purchases can be made in local currency. They also avoid the additional shipping and handling charges (see below) that can considerably increase the costs of direct orders from the United States.

Customers in countries and territories not served by a publications distributor should send their orders for World Bank publications to the Philadelphia address above or to the Paris address listed on page 98 .

Order Coupons

Coupons for ordering titles from the World Bank order fulfillment address in Philadelphia are provided at the back of this *Index*. Please note special instructions about method of payment, use of credit cards, shipping and handling charges, and air mail surcharge outside the United States (see also below). If the coupons are not used, please cite key code IND4 on the order.

Shipment of Publications

Orders filled from the World Bank in the United States will normally be shipped by surface mail. All customers who are including payment or charging with a credit card should add US$5.00 for shipping and handling for each order, *including orders for free publications*. Those institutions ordering with a purchase order will be charged actual shipping and handling costs. Customers outside the United States who require faster delivery by air mail should add US$8.00 for one item, plus US$6.00 for each additional item to be shipped by air mail. Customers with a Federal Express account can ask to have an express shipment charged to their account. For method and cost of shipment by local distributors, contact the appropriate distributor.

Pricing and Price Codes

Prices listed in this Index are applicable only in the United States and in countries with no official World Bank distributor.

A price code is given for each publication listed in the **Titles** section. Please refer to the World Bank Publications Price Schedule at the right for U.S. dollar equivalents.

Customers in countries served by a World Bank publications distributor should contact the distributor for the local price schedule. Prices vary by country according to local trade practice, mailing and handling costs, government taxes, and import surcharges where applicable.
